OBJECTIVE

Passionate about backend development with Node.js, I am seeking a Backend Node.js Developer role to apply my skills and contribute to impactful projects. With proficiency in Node.js, Express, and MongoDB, I am dedicated to delivering efficient and reliable solutions. I am eager to join a collaborative team where I can continue to learn and grow, while leveraging my strong problem-solving abilities, attention to detail, and commitment to delivering high-quality work.

SKILLS

Node.js, Express.js

MongoDB, PostgreSQL

HTML, CSS, React

Git, Docker

SQL, MySQL

Jest, Mocha

JavaScript, TypeScript

Solidity, Ethereum

PROJECTS

orgFeeder

An app to get Feature requests, Feedback and Bug report for an organization.

- Developed backend using Node.js, Express, and MongoDB for the orgFeeder project.
- Implemented key features including Feedback, Feature Requests, and Bug Reports.
- Employed Jest for testing, GitHub Actions for CI/CD, Docker for containerization, and Render for deployment.
- Collaborated with the team, conducted code reviews, and followed Agile methodologies.

movie-booking

- Developed APIs for CRUD operations involved in movie booking corresponding to admin and normal user.
- Used Node JS, Express, MongoDB, JWT, and other relevant technologies.

Hotel API

- Developed a secure hotel management API using Node.js, Express, and MongoDB.
- Implemented user authentication using JWT tokens to allow registered users to register hotels.
- Employed Jest for testing and ensured data integrity through input validation.

Digital Voting based on Blockchain

A final year major college project.

Built few APIs Fast API for digital vote counting and displaying the results. Used Swagger UI to deal with front end.

Miscellaneous

- Various backend mini projects utilizing CRUD operations, JWT authentications, express-validations and others important packages.
- Created MERN app to deal with authentication using Vite, Node, Express, React and MongoDB.
- Built simple static site using React and CSS while learning about React.
- Different miscellaneous projects like web scrapping, python scripting, backend APIs, etc. were done while learning them. These projects mostly include the usage of selenium, BeautifulSoup, etc

PROFESSIONAL EXPERIENCES

04/2023 – 05/2023 Pokhara, Nepal	Node JS Intern <i>Black Tech</i>  <ul style="list-style-type: none">• Acquired practical experience in developing robust backend solutions using Node.js, Express, and MongoDB.• Collaborated with the team to design and implement RESTful APIs for efficient data retrieval and manipulation.• Gained proficiency in version control using Git, ensuring seamless collaboration and code management.• Demonstrated knowledge of containerization techniques by working with Docker to create portable and scalable applications.• Contributed to the deployment process by assisting in the setup and configuration of applications on various platforms.• Developed skills in manual testing methodologies, ensuring the quality and reliability of software deliverables.
